Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The Information Disclosure Statement received on August 1, 2003 has been reviewed by the Examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pierce et al (US 4,736,538) in view of Johnson (US 1,904,738).

Pierce et al discloses a generally rectangular display device 11 comprised of a layer of flexibly resilient plastic having a central open portion 18 and formed into a pair of substantially similar members 12, 13. Each member has a cavity defined by planar bottom 22 surrounded by walls 16-21. These features are shown in figure 1 of the prior art. A living hinge connects the two frames 12, 13 together and allows one frame to pivot over the other frame. The walls form a seal around the frame and a flange 45 holds the two sides together to keep out debris.

Pierce et al discloses the features as described above. However, pierce et al does not disclose a steak, integrally formed with the frame, to insert the display device into the ground. Johnson discloses a display device with an integrally formed steak for insertion into the ground. It would have been obvious to one of ordinary skill in the art to

apply the prior art of Johnson as a teaching to integrate a steak with the frame of Pierce et al to supply a way for easy placement of the display device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morvant (US 4,790,088) and Arnold et al (US 6,094,871) both disclose types of hinged display devices.
